Examiner's Reasons for Allowance

The prior art does not anticipate nor render obvious over Applicant's claimed subject matter. In view of the claimed subject matter as a whole, the prior art does not positively disclose dividing the discharging process into a first discharging duration, during which a predetermined first amount of electrical energy is discharged from the piezo actuator, a subsequent holding time duration, during which the piezo actuator is not controlled, and a subsequent second discharging duration, during which a predetermined second amount of electrical energy is discharged from the piezo actuator.

After a further search, Examiner believes the claims are in a condition for allowance.
